RITA, 23

Student at DETI

GOALS

- Ensure that exists enough stock of its specific merchandise.
- Keep track of inventory in a simple and efficient way.
- Provide an organized and up-to-date online system to manage stock and sales.

PROFILE

Member of the student committee. She is responsible for managing the stock of merchandise for the Informatics Engineering course, ensuring that students can easily purchase their desired items. Passionate about organization and efficiency, she wants to streamline the inventory management process to avoid stock shortages and delays.

CHALLENGES

- Difficulties in tracking stock levels, leading to shortages or overstock.
- Lack of an integrated system to manage inventory and sales efficiently.
- Time-consuming manual updates, making it harder to stay organized.
